

WATT'S NEW AT HUTT ELECTRIC

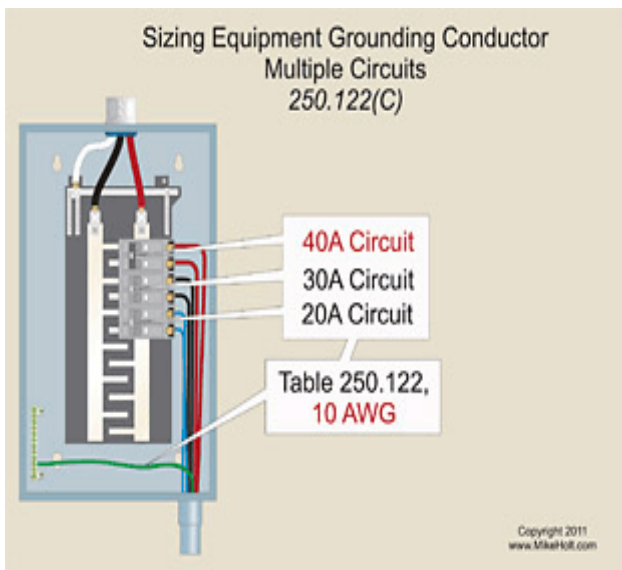

Welcome to our 194th
edition of our newsletter!

January 2011

"We're here to help you help your customers"

This newsletter will provide you, our customers, with information on new technologies, products, discontinuations, etc. in the electrical industry. It will also provide you with information on any projected price increases, price decreases, and any 'special buys' at Hutt Electric Supply.

NEC Code Questions and Answers.....

Q. What is the sizing rule for an equipment grounding conductor in a raceway that contains multiple circuits?

A. When multiple circuits are installed in the same raceway, cable, or cable tray, only one equipment grounding conductor is required for the multiple circuits, sized in accordance with 250.122, based on the rating of the largest circuit overcurrent device [250.122(C)]. Single conductors used as equipment grounding conductors in cable trays must be sized 4 AWG or larger [392.3(B)(1)(c)], as shown in the **Figure**.

A single equipment grounding conductor is sized to the rating of the largest circuit over-current device.

All questions and answers are based on the 2008 NEC, taken from EC&M (http://ecmweb.com/nec/code_qa/)
