

WATT'S NEW AT HUTT ELECTRIC

Welcome to our 165th
edition of our newsletter!

July 2008

"We're here to help you help your customers"

This newsletter will provide you, our customers, with information on new technologies, products, discontinuations, etc. In the electrical industry. It will also provide you with information on any projected price increases, price decreases, and any 'special buys' at Hutt Electric Supply.

July Klein Tool of the Month Insulated #2 SQ Tip Screwdriver #666-INS

Klein insulated tools exceed IEC 60900 and ASTM F1505 standards for insulated tools, and are clearly marked with the official 1000-volt rating symbol. Two layers of insulation provide protection against electric shock. Set contains 1-8" key-stone tip and 1-8" No. 2 Phillips tip screwdrivers. Don't forget that per 2007 Federal OSHA rulings, it is the employers responsibility to provide insulated tools for live circuits of 50 volts or higher.

Only \$14.95 ea.

(remember each purchase qualifies for end of year bonus drawing consisting of each tool-of-the-month throughout the year and the Klein tool bag.)

Happy 4th of July !

We will be closed on Friday,
July 4th for the Independence
Day Holiday.

Now Stocking.....

666-INS	Klein #2 Square tip 1000v insulated screw driver.
SG016RBS	Siemens 16kW stand-by air cooled generator.
0F6148DSRV	Siemens cold weather kit for air cooled generators.

GFCI Locations in Multi-Family, Commercial, Industrial, and Public Facilities

The 2008 NEC has made modifications and changes that clarify where GFCIs are required.

For multi-family dwellings, each unit with a separate entrance at ground level must have at least one exterior accessible GFCI receptacle located no higher than 6 ½ feet above the ground. Any 20 square foot or larger balcony, deck or porch of a dwelling unit that is accessible from within that unit must have at least one GFCI receptacle available within 6 ½ feet above and within the perimeter of the space.

In non-dwelling units, all bathroom 125V 15 and 20 amp receptacles within six feet of an outside edge of a sink must be GFCI-protected. All 125 V 15 and 20 amp receptacles in any area with a sink and permanent facilities for a food preparation and cooking must be GFCI-protected, including such defined spaces within offices or industrial facilities. Also, GFCI protection is required for electric drinking fountains.

All outdoor 125 V 15 and 20 amp receptacles located outdoors at non-dwelling units, including those on rooftops, must be GFCI protected.

“Beside location, there are two other concerns addressed in the 2008 NEC, both relating to grade,” pointed out Bill Grande, Director of Safety Products, Leviton Manufacturing Company. “For residential construction 15A and 20A 125V receptacles, including GFCIs, have to be tamper resistant. And all receptacles in damp or all wet locations must be weather resistant and listed as such, including GFCIs.”

RENTALS

Equipment:

- ◆ Mini-Tower Scaffolding
- ◆ 22' Scissors Lift
- ◆ Tractor/ Loader
- ◆ 3-Point Disc/ Cultivator
- ◆ 3-Point 48" Brush Mower
- ◆ Tandem Axle Trailer
